NEMHA INFORMATION GUIDE

1. CAPITAL SUBARU RINK – HEBRON WAY

We are pleased to announce that we have secured a large amount of ice time at Capital Subaru Arena. The dimension of this rink is 145ft X 65 ft (bigger than St. Bon's, but smaller than Jack Byrne Arena). The association will be using this season as a trial period to see what works and doesn't work at this rink, keeping in mind that there are certain Hockey Canada guidelines that we must abide by. **We are asking our members to please be patient with the board and staff as we try to navigate through this new opportunity.**

The Association has gotten approval from Hockey NL to play games up to U11 House League at this rink. According to Hockey Canada, there are many benefits to using a smaller ice surface; 2X more puck touches, 6X more shot attempts, 3X more pass attempts and 5X more passes received.

All Learn to Skate, U7 and U9 programming will be at Capital Subaru.

U11 House will be a 3-line team league and will play "some" of their games at this facility as a trial period, but most of the games will be played at Jack Byrne Arena or another full-sized rink. That ratio will be determined as we get more into our scheduling. U11 house teams will have 1 team practices at Capital Subaru and 2 team practices at Jack Byrne Arena or another full-sized arena.

U13/U15 House "may" be asked to practice at this facility from time to time on a rotational basis to share the ice usage within the association. This is a great opportunity for teams to use this rink for Skill Work and Small Area Games if this situation arises.

U11/U13/U15 All Star/Developmental teams "may" be asked to practice at this facility from time to time on a rotational basis to share the ice usage within the association. This is a great opportunity for teams to use this rink for Skill Work and Small Area Games if this situation arises.

We will use this facility to try and keep as many players as possible on ice during times that Jack Byrne Arena has their Blackout Periods.
